

You need end-to-end
energy solutions.

We can give them to you.

In conjunction with our sister company,
Centrica Business Solutions, we deliver
innovative ways for you buy and use energy.
We offer a complete portfolio of electricity
and natural gas procurement solutions
customized to your needs.

You need a smarter way to buy natural gas.

GasPortfolio® gives it to you.

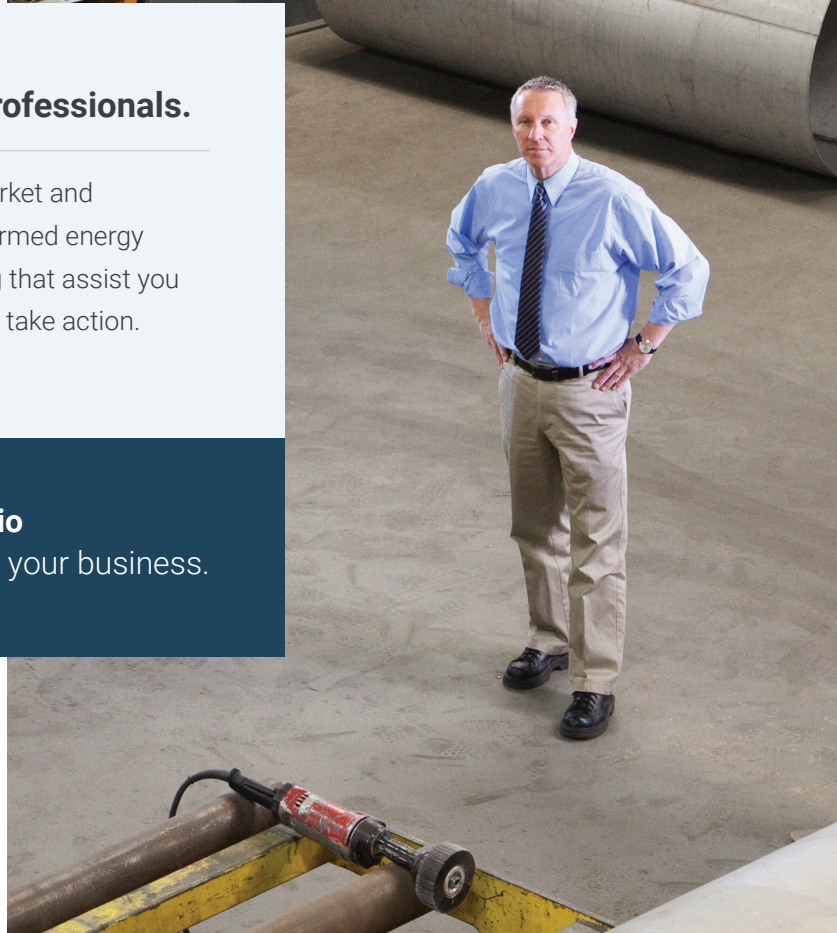

Actively managing your natural gas spending.

With GasPortfolio®, your natural gas supply isn't just an energy purchase—it's a complete energy strategy that combines our energy expertise with data reporting and market monitoring. If you want to actively manage your natural gas spending and have a high-volume requirement, 50,000 GJ or higher or multiple sites/locations across a region, then GasPortfolio is the right solution to fit your needs.

Gain access to a dedicated team of energy professionals.

Your energy advisor are your eyes and ears in the energy market and help manage your day-to-day energy strategy with more informed energy solutions. You receive active market and account monitoring that assist you with critical decision making and alert you when you need to take action.

You want more out of
your electricity spending.

PowerPortfolio[®] gives it to you.

Crafting a wholesale solution to meet your energy goals.

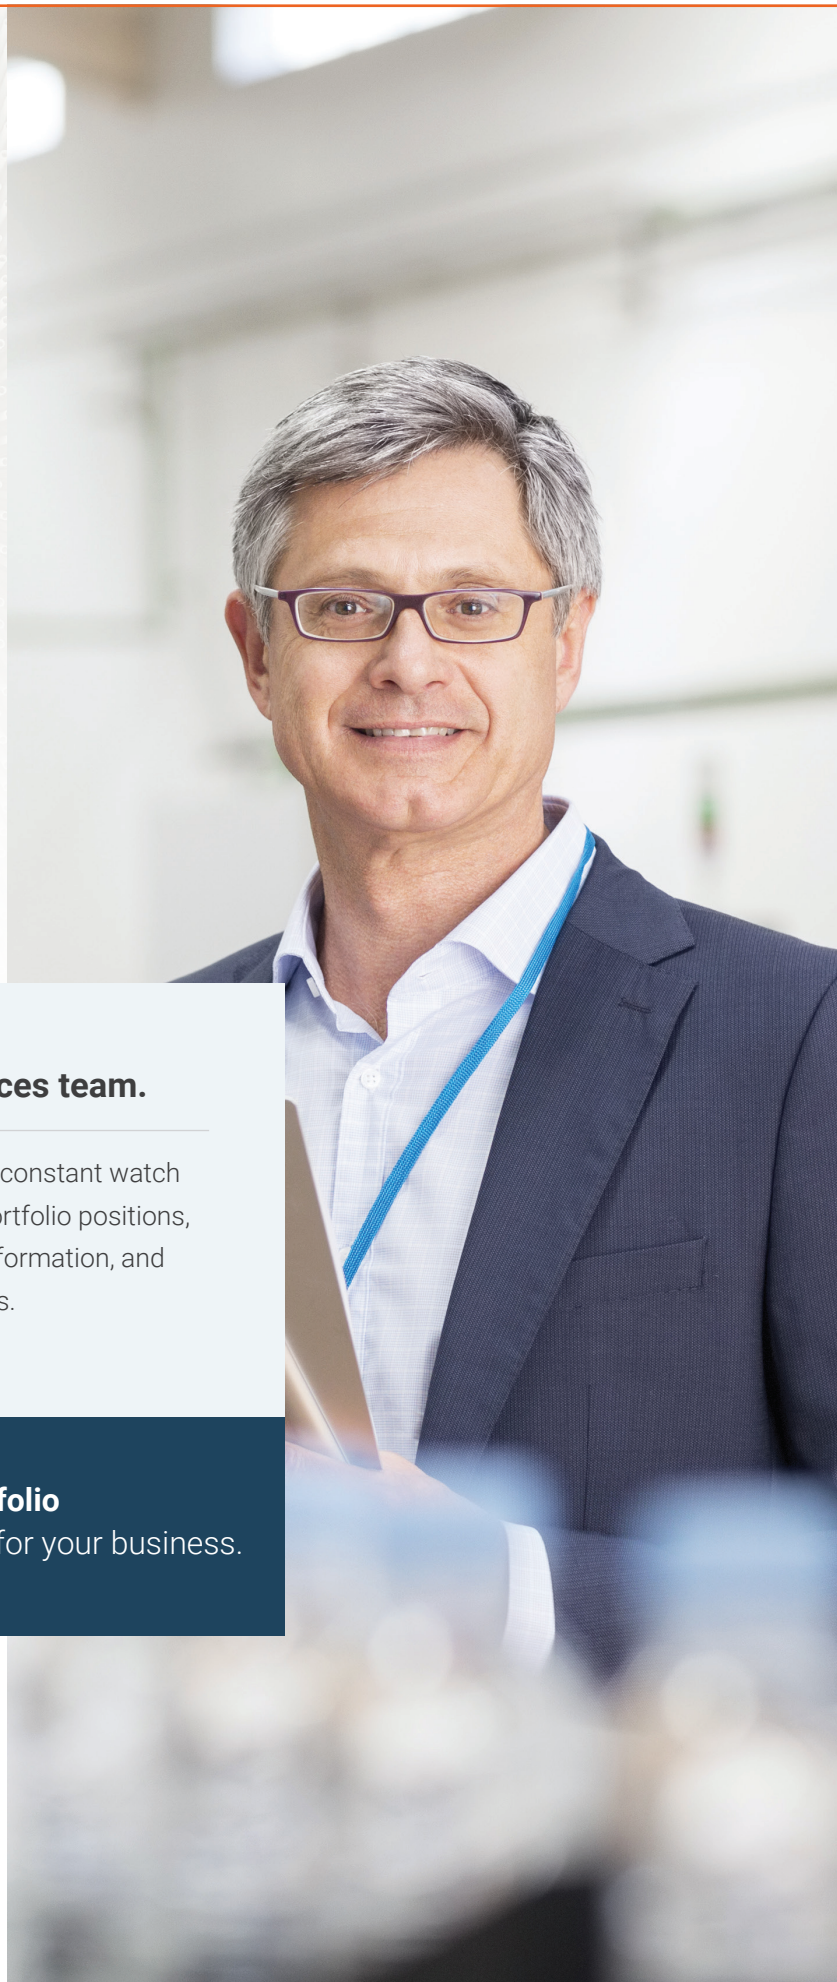

It's time to take advantage of your position in the energy market. PowerPortfolio[®] positions you to seize new forward purchases and favorable price offerings. Based on your business and budget goals, your portfolio includes a blend of future retail electricity supply, secured through fixed price block purchases, as well as a comfortable degree of market exposure.

It starts with our experienced Strategic Services team.

With PowerPortfolio, you'll have a dedicated team keeping a constant watch on the wholesale market. They'll continually evaluate your portfolio positions, initiating dialogue to share market insights and regulatory information, and recommending purchasing options that fit your unique needs.

An energy strategy that delivers the best of both worlds.

Load Following Block & Index

Breaking the one-size-fits-all electricity plan.

Capitalize on the best of both a fixed price and index-based strategy with a Load Following Block & Index product from Direct Energy Business. You can lock in a portion or all of your usage at a fixed price to satisfy your specific tolerance, while floating your unfixed load at index prices.

A plan that's flexible and customizable.

This product ensures that you can layer your fixed purchases over time, as market opportunities arise—rather than having your full load requirements locked in at a specific point in time. And, this strategy is flexible and allows you to play an active role in managing your energy costs.

You want greater visibility into your energy spending.

EnergyPortfolio gives it to you.

EnergyPortfolio™, our powerful web portal and mobile app, is offered at no extra charge to customers on GasPortfolio, PowerPortfolio and Load Following Block & Index. You can access detailed energy insights, market information and custom reporting tools right at your fingertips.

Key Benefits

EnergyPortfolio allows you to analyze past and forward market data, presenting opportunities while ensuring that power purchases are being made at the appropriate time. You will visually see the impact your purchases make on your energy strategy. EnergyPortfolio also provides resources like an interactive strategy tool for forward purchase scenarios and price target monitoring.

You want your energy strategy to create value.

Demand Response can help give it to you.

Our full range of solutions to take you even further.

Our sister company, Centrica Business Solutions, provides new thinking, new technologies and new ways of working so that you benefit from our end-to-end energy management strategies and services. One of these services, Demand Response, can generate new revenue for your business by reducing your energy use at peak times with intelligent technology that helps you balance supply and demand and manage consumption.

Optimize your curtailment strategy, while maximizing revenue and minimizing risk.

With Demand Response, you can increase your efficiency and automatically receive payments. Our in-house technologies maximize value through deeper insight into consumption, and you will receive real-time energy asset monitoring and insights into operational performance.

 Time is limited to take advantage of Demand Response. Visit directenergybusiness.com/dr-pjm to learn more.

The energy industry is rapidly evolving and Direct Energy Business is driving the change—by doing more than just supplying energy. In collaboration with our sister company, Centrica Business Solutions, we can now offer a nearly unrivaled suite of next-generation energy solutions for businesses. Our portfolio of commodity supply and distributed energy solutions can help our customers improve operational efficiency, increase resilience and inspire growth.
